

Terminal as a Service (TaaS)

Optimize Your Total Cost of Ownership

TaaS is an end-to-end solution developed by Ingenico to manage terminal estates. We take care of your terminal fleet while you can focus on growing your business.

With 40 years in the payments industry, Ingenico, the global leader in seamless payments, provides unparalleled experience and best-in-class quality service, allowing our customers to completely rely on us.

The TaaS solution is a modular end-to-end offering that can be customized according to customers' needs. We cover all aspects of the payment terminal life cycle from pre-sale consulting to hassle-free replacement.

Peace of mind comes standard.

TaaS is an end-to-end solution delivered through a convenient monthly fee that will cover the full-service bundle. Ingenico will adapt and customize the modular offering in accordance to a client's needs, bundling hardware, software and services into one single solution. Instead of facing capital expenses and unexpected costs, our customers can benefit from a simple and cash predictable model.

Key benefits of TaaS include:

Flexible and Up To Date: Grow and update your terminal fleet following market trends and customers' needs.

Optimize Your Total Cost of Ownership: Remove constraints of managing estate assets through this scalable and predictable cost model. Shift from a traditional capital expense to an operating expense model.

One-Stop Solution: You can rely on Ingenico as a partner to assist you on all your asset management services needs.

Benefit From a Payment Expert: Let Ingenico accompany you in your business transformation. No need to build additional internal hardware related skills.

Customer Care Included: Ingenico's Total Care and Help Desk services are included to make your solution trouble-free.
